

PROFESSIONAL SUMMARY

Backend-focused developer with experience in Django, GraphQL APIs, and automation testing. Skilled in building scalable backend systems, debugging API workflows, and developing developer-focused tools. Interested in backend architecture, API performance optimization, and AI-driven engineering workflows.

SKILLS

Languages	Python, JavaScript, SQL
Backend	Django, Node.js, Express.js, REST APIs, GraphQL
Testing & Automation	Selenium WebDriver, Functional Testing, Regression Testing, API Testing
Databases & Caching	MongoDB, MySQL, PostgreSQL, Redis
Backend Infrastructure	Celery, Docker, Linux
Tools	Git, GitHub, Postman, Chrome DevTools
Emerging Tech	AI Workflows, Automation Systems, Developer Tooling

EXPERIENCE

Web Developer AssociateOct 2025 – Present
CreeSync Software SolutionsRemote

- Developed backend features using Django with focus on scalable API architecture and structured workflows.
- Worked with GraphQL APIs, optimizing query handling and improving backend response workflows.
- Debugged API request/response failures and collaborated with developers to improve backend reliability.
- Analyzed backend workflows and contributed to improving overall API performance and maintainability.

Automation Tester InternMar 2025 – Sep 2025
Laitkor Consultancy Services Pvt. Ltd.Remote

- Developed Selenium automation scripts using Python to validate end-to-end web application workflows.
- Improved test execution efficiency by automating repetitive browser-based testing processes.
- Worked with dynamic web elements and improved understanding of DOM behavior and UI interactions.
- Maintained automation frameworks and collaborated using Git-based development workflows.

PROJECTS

SnoRelax – Full Stack Mental Wellness Platform

- Developed a full-stack platform with mood tracking and chatbot interaction features.
- Implemented role-based authentication and structured backend APIs for user workflows.
- Designed backend architecture for session management and scalable user data handling.
- Tech Stack: React.js, Node.js, Express.js, MongoDB

API Error Inspector – Chrome DevTools Extension

- Built a Chrome extension to detect failed REST and GraphQL API requests in real-time.
- Improved debugging workflows by logging failed API responses directly within browser activity.
- Enhanced frontend-backend debugging visibility for developers during API testing.
- Tech Stack: JavaScript, Chrome APIs

EDUCATION

Shri Ramswaroop Memorial College of Engineering & Management
B.Tech in Computer Science (Data Science)2022 – 2026
